CS4095-Embedded Control of Robotics

Assignment # 02

Marks = 15 Last.Date: 10/09/2025

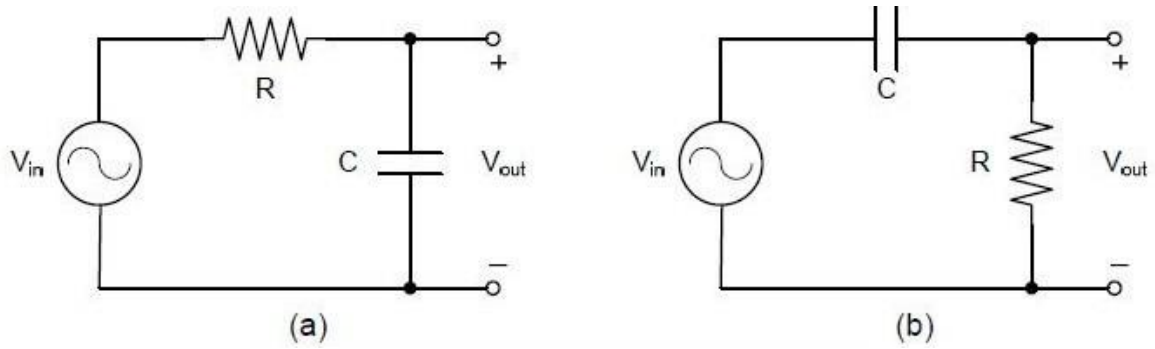

Q1. Compare and Contrast with example

a. Causal vs Non-causal System

b. Time Variant vs Time-Invariant System

c. Stable vs Non-stable System

Q2. For the following two circuits, figure out the transfer functions

Q3. The transfer function of a DC motor is H[s] = 0.2s^2 / (s^3 +2s -0.9). Using python control package, implement this system in Python. Plot the step response of this system.
